# THE NIGERIAN INSTITUTE OF BUILDING

## 2023 – 2025 NATIONAL EXECUTIVE MEMBERS

**Bldr. (Sir) Alderton Ewa Ewa, FNIQB**  
President (NIOB)

**Bldr. Bimbo Kolade, FNIQB**  
1st Vice President (NIOB)

**Bldr. Idris Abubakar Saddiq, FNIQB**  
2nd Vice President (NIOB)

**Bldr. (Mrs.) Eucharia Chika Enebe, FNIQB**  
3rd Vice President (NIOB)

**Bldr. (PROF.) Yohana D. Izam, FNIQB, JP**  
Immediate Past President (NIOB)

**Bldr. (Dr.) Yusuf Mahmood, FNIQB**  
Hon. General Secretary (NIOB)

**Bldr. Victor Friday Okon, MNIQB**  
Asst. General Secretary (NIOB)

**Bldr. John Ugwoeri, FNIQB**  
Registrar (NIOB)

**Bldr. (Dr.) Mrs. Victoria O. Akinola, FNIQB**  
Treasurer (NIOB)

**Bldr. (Dr.) Aminu S. Mubarak, MNIQB**  
Financial Secretary (NIOB)

**Bldr. Peter Ameh Omale, MNIQB**  
Public Secretary (NIOB)

**Bldr. Olusegun A. Esan, MNIQB**  
Secretary, Research & Development (NIOB)

# FORWARD

THE MAIDEN EDITION OF THE  
**SKILL DIGEST**

**T**he Artisans and Craftsmen Qualifications Awarding Board was created by the Nigerian Institute of Building, the Awarding Body for construction trades under the National Skills Qualifications.

The Board is saddled with the responsibility of registering NSQ training centres, monitoring the activities of registered centres, auditing centres processes and externally verifying & certifying trainees.

Currently, the Board certifies the following trades under the construction sector; Carpentry, Electrical Installation, Plumbing Installation, Masonry, Tiling and Decorative Stonework, Painting & Decoration, Welding & Fabrication. More trades are being developed for the sector.

The Skills Digest is conceived to document the activities of the Awarding Body and to provide information about the National Skills Qualifications and what the Board is doing to ensure the entrenchment of skills in Nigeria. It is expected to be a quarterly publication that will highlight the activities of the The Nigerian Institute of Building as an Awarding Body for construction trades.

This maiden edition of Skills Digest highlights the activities of the Board for the year 2023. The 2 Day training for Sector Skills Councils and Awarding Bodies Managers organised by the National Board for Technical Education (NBTE) and World Bank under the IDEAS Project on 30th and 31st January, 2023 was timely. It provided a good take off for the activities of the Board.

During this period, the Awarding Body trained its External Quality Assurance Managers in preparation for the task ahead. Continuous Professional Development Workshops held respectively on 13th & 14th April, 2023 and 26th September, 2023. It was an opportunity to share ideas and standardise practice on the guidelines for the duties of an EQA during Centre Registration, Monitoring, Auditing and Verification visits.

External Quality Assurance Managers were also assigned to various centres around the country that have indicated

interest to register with the Awarding Body as an NSQ training centres. The centres were visited and assessed based on infrastructures, policies, resources etc.

EQAs were also assigned to centres that have presented themselves for the External Verification of their trainees portfolios. Different certificates were issued based on achieved trades, levels and units.

The Board commenced discussions with the management team of Ogun State Skills Fund (OSF). Ideas on how to support and collaborate with the Team for centre registration and certification were harnessed. Discussions are ongoing and has progressed considerably.

The Awarding Body was represented at the presentation of NSQ certificates to trainees that were trained by Kaduna State Polytechnic under Recognition of Prior Learning.

The Regional Capacity Building Workshop on Recognition of Prior Learning (RPL) and Sector Skills Councils (SSC) which was organised by Sub-Sahara Africa Skills and Apprenticeship Stakeholders Network (SASASNET) with the support of International Labour Organisation (ILO) at Accra, Ghana on 21st and 22nd November, 2023 was a great opportunity for the Awarding Body to develop its policies and strengthen practices on Recognition of Prior Learning.

Finally, this maiden edition is fully packed with information that will help the reader understand the roles of the Nigerian Institute of Building as an Awarding Body for construction trades and what the Board has done to propagate NSQ. I wish you a happy reading of this Skills Digest.

**Bldr. Dr. Christopher C. Belonwu,**

## The Roles of THE NIGERIAN INSTITUTE OF BUILDING in NSQF Delivery

# NSQF:

## An Introduction

**T**he Nigerian Skills Qualifications Framework (NSQF) is a system for the development, classification and recognition of skills, knowledge, understanding and competencies acquired by individuals, irrespective of where and how the training or skill was acquired. The system gives a clear statement of what the Learner must know or be able to do; whether the learning took place in a classroom, on-the-job or less formally. The Framework indicates the comparability of different qualifications and how one can progress from one level to another. The NSQF is the structure within which the National Skills Qualifications (NSQs) operate. The Framework aims at;

- Promoting lifelong learning
- Providing quality assurance and recognition

### The NSQF System: Who Does What?

**Regulatory Body:** The National Board for Technical Education (NBTE) accredits proposals for qualifications submitted by Awarding Bodies, and monitors these bodies offering NSQs. NBTE effectively manages the whole system on behalf of the Government.

**Sector Skills Councils (SSCs):** identify, define and update employment-based standards of competence for agreed occupations. These effectively represent the interests of the trade or industry concerned, to which the particular NSQ relates. Sector bodies define what the job entails. For government led Sector Skills Council, the composition should be 70% industry /employers and 30% trade unions, professional associations, academia, etc. The Chair will be from the industry.

**Awarding Bodies (ABs)** design assessment and quality assurance systems, and gain sector bodies endorsement prior to submission to NBTE for accreditation of the qualification. ABs approve training and assessment centres to offer NSQs, implement and assure quality of the NSQs. Awarding Bodies are basically the top level training certification organisations (the ones whose names and logos are on the certificates). They don't deliver the training, they design the structures of the qualifications and accredit the certification, which the training organisations and Assessment Centres use and deliver. ABs engage with client organisations if they are large enough to have their own NSQ training and delivery departments. Awarding bodies also engage with Sector Bodies and training organisations. Training organisations are effectively distributors of the Awarding Bodies' qualifications systems. ABs undertake external verification to ensure that candidates are being assessed fairly and consistently across all Centres

**Training Providers:** deliver NSQ training in partnership with the industry, register candidates, assess and guide candidates towards achieving NSQs.

**Assessment Centres:** assess NSQs according to Awarding Body criteria

### National Occupational Standards (NOS)

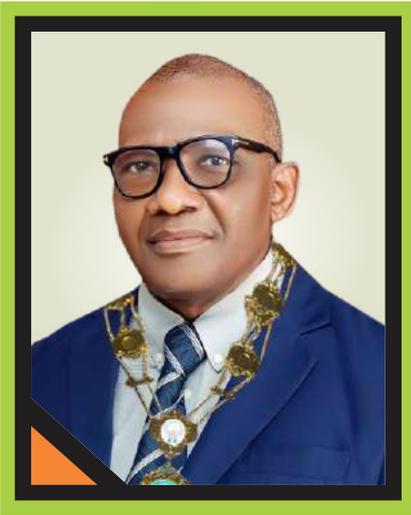

**N**ational Occupational Standards (NOS) are statements of performance or competences an individual must demonstrate when carrying out job functions in the workplace, together with specifications of the underpinning knowledge and understanding. NOS are National because they can be used in every part of the country where the functions are carried out. NOS are Occupational because they describe the performance required of an individual when carrying out the job functions in the workplace, i.e. in their occupation (as a plumber, carpenter, production engineer, etc.) NOS are Standards because they are statements of effective performance which have been agreed by a representative sample of employers and other key stakeholders and approved by the National Board for Technical Education (NBTE).

# THE NIGERIAN INSTITUTE OF BUILDING MAIDEN SKILLS PUBLICATION SPEECH

BY

**BLDR. SIR. ALDERTON EWA EWA, FNIQB**

*President and Chairman of Council of The Nigerian Institute of Building*

One of the challenges of the building construction sector in Nigeria since the disintegration of the training structures and certification systems such as the craft and technical schools, the City and Guilds, WAEC technical

certification and loss of credibility of the trade test certificates which have lately been issued without definitive assessment of attendant skills and competencies, has been the lack of a viable system for selection and recruitment of artisans and craftsmen to construction sites.

Plugging the obvious gaps gave rise to the Nigerian Skills Qualification Framework (NSQF), a system for the development, classification and recognition of skills, knowledge and competencies acquired by individuals, irrespective of where and how the training or skill was acquired. The system gives a clear statement of what the learner must know or be able to do whether the learning took place in a classroom, on-the-job, or less formally. The framework indicates the comparability of different qualifications and how one can progress from one level to another. Generally, the framework is aimed at; promoting lifelong learning, providing quality assurance and recognition. The objective of NSQF is to ensure the quality, status, relevance and provision availability of TVETs. National Skills Qualifications are quite different from conventional qualifications, they are about showing others that people are competent to do the job. They require that people can consistently show to an assessor that they can do the job competently and answer questions associated with the job.

The National Board for Technical Education (NBTE) licensed the Institute on the 4th of November, 2014 as an Awarding Body for the training of Artisans and Craftsmen in the National Skills Qualification Framework (NSQF). Awarding bodies play a crucial role in skills certification. They are responsible for designing, developing, and administering certification programs. Their roles typically include:

1. Curriculum Development: Awarding bodies create training and assessment materials that align with industry standards, ensuring that candidates acquire the necessary skills.
2. Assessment and Evaluation: They design and conduct assessments to evaluate candidates' skills and knowledge, often through exams or practical evaluations.
3. Certification Issuance: Awarding bodies issue certifications to candidates who successfully meet the required standards, validating their skills and qualifications.
4. Quality Assurance: They ensure that certification programs maintain high standards and regularly update them to reflect industry changes.
5. Industry Collaboration: Awarding bodies often collaborate with industry experts and employers to ensure that certifications meet current industry needs.
6. Credibility and Trust: They establish credibility and trust in the certification process, making it valuable for employers and individuals seeking skilled workers.

In summary, awarding bodies play a pivotal role in maintaining the quality and relevance of skills certification programs, benefiting both individuals seeking certification and the industries they serve. Since the development of the first National Occupational Standard (NOS) for the construction industry in 2015, and its

validation by industry stakeholders, it has since become a standard for construction works in Nigeria. The Institute has been engaged in the assessment and certification of Artisans and Craftsmen for the following projects; The assessment and certification of 690 Candidates across Kaduna, Kano and Katsina States under the Mafita Programme, sponsored by UK Department For International Development (DFID) and facilitated by Adams Smith International. The assessment and certification of NPower Build Trainees for Batch 1 and 2 under the Federal Government of Nigeria, National Skills National Investment office (NSIO).

The Institute is currently in partnership with Council of Registered Builders of Nigeria (CORBON) and Industrial Training Fund (ITF) for the registration of centres that participated in the NPower Batches C1 and C2 and the certification of the Trainees. Hydraulic Equipment Development Institute (HEDI), the agency in charge of the Federal Government N-Skills program has also registered as a Training Provider with the Institute. Talks are ongoing with Ogun State Skills Fund for the registration of centres and certification of trainees under their Community Based Apprenticeship system. On our role as the Awarding Body for the certification of Construction Artisans and Craftsmen under the Nigeria Skills Qualifications Framework (NSQF), the Institute will ensure it lives up to expectations from the Regulatory Body through the Artisans and Craftsmen Qualifications Awarding Board.

We understand that NBTE has been making serious efforts towards the entrenchment of NSQF in the country through the formal and informal sectors which has led to the training of more Assessors, Internal Quality Assurance Managers and External Quality Assurance Managers. We are complementing the efforts of the Regulator to ensure that more centres are brought onboard and that Quality Assurance Managers (Assessors, Internal Verifiers and External Verifiers) that will work in our sectors are trained and retrained for suitability due to the unique nature of the construction industry. Based on the mandate of NBTE to Polytechnics on the adoption and entrenchment of NSQ through the ONE STUDENT,

TWO CERTIFICATES initiative, we are already collaborating with Polytechnics to ensure a seamless process.

Liaising with the Regulatory Body and Sector Skills Council, we will ensure a complete harmonisation of the various editions of the National Occupational Standards (NOS) in circulation to reflect currency, validity and authenticity. Where necessary, we will push for the updating of some NOS to reflect current practices in the industry and develop new ones for specific trade areas. The Institute is currently working on the scale of fees for the Quality Assurance Managers to ensure they get adequately compensated to forestall sharp practices in the Quality assessment ecosystem. I believe that programs, government or privately funded which are anchored on NSQ should be deliberate and carefully implemented to meet the desired outcome.

Based on Council approval for the integration of National Skills Qualifications (NSQ) levels 1 to 5 in the schemes of service at the 45th National Council on Establishments (NCE) meeting which held from 11th to 13th December, 2023 at Bauchi State, the Institute will collaborate with Ministries, Departments and Agencies for a seamless implementation.

We will collaborate with relevant national and international skills funding bodies to strengthen our roles as an Awarding Body because the certificates we issue must be credible.

In conclusion, empowering construction artisans through skills certification is a valuable initiative. Certifications can provide recognition of their expertise, enhance employability, and improve overall industry standards. This helps artisans access better job opportunities and contributes to the construction sector's growth and quality.

On behalf of the Nigerian Institute of Building, I heartily congratulate the Artisans and Craftsmen Qualifications Awarding Board for this maiden edition of the Skills Digest. I hope it throws great light into the activities of the Board.

Thank you and remain blessed.

# ARTISANS & CRAFTSMEN QUALIFICATIONS AWARDING BOARD IN PICTURES

Pictures from Maiden CPD workshop for EQAs (Qualified and Ongoing)  
"2023 MANDATORY CONTINUOUS PROFESSIONAL DEVELOPMENT"

**REGIONAL CAPACITY BUILDING WORKSHOP ON RECOGNITION OF PRIOR LEARNING (RPL) AND SECTOR SKILLS COUNCILS (SSC)**

**21-22 November, 2023 at the Best Western Plus Beach Hotel, Accra, Ghana.**

**Meeting with Ogun State Skills Fund (OGSF) on 26th September, 2023 at Abeokuta, Ogun State.**

## ABEOKUTA ARTISAN TRAINING RESOURCE CENTRE

ELECTRICAL INSTALLATION WORKSHOP

TRAINING CLASSROOM

WATER FACILITIES

TRADES NATIONAL OCCUPATIONAL STANDARD

WELDING & FABRICATION WORKSHOP

Bldr Kunle Awobodu at ABEOKUTA ARTISAN TRAINING RESOURCE CENTRE

**KUFMAN CENTRE RIVERS**

**BUILDRIGHT SKILLS CENTRE KANO-AMINU MAIWADA ALLAWAL**

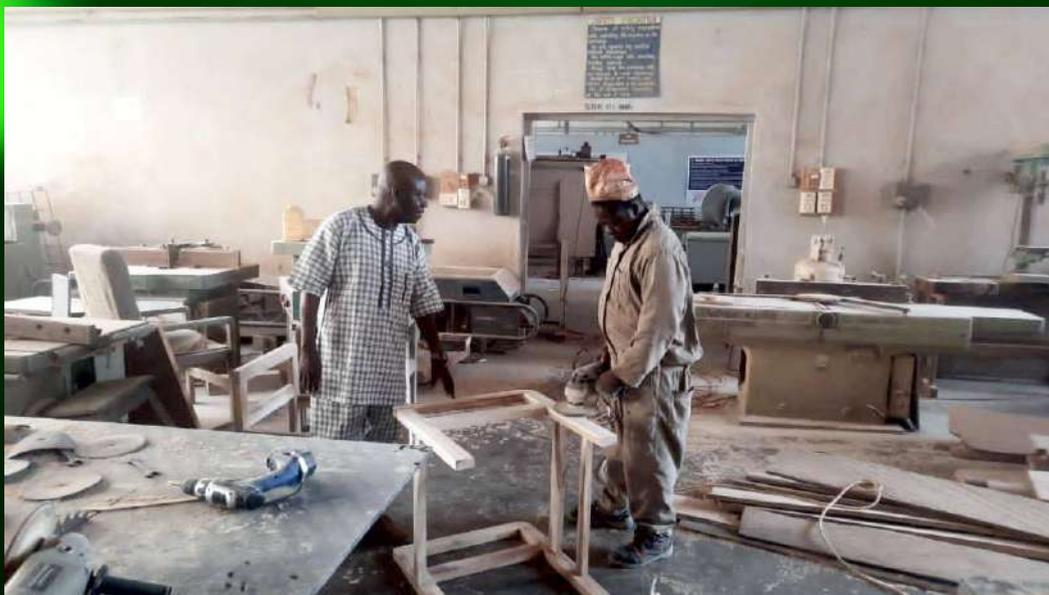

**PICTURE WITH THE RECTOR AND MANAGEMENT OF DELTA STATE POLYTECHNIC, OGWASHI UKU, DELTA STATE, DURING THE CENTRE REGISTRATION VISIT TODAY, 10/1/2024.**

**PHOTO EVIDENCE OF FEDERAL POLYTECHNIC ADO EKITI CENTRE VISITATION**

**BLDR. IGBORODOWO OLUROPO (EQA) WITH CENTRE'S STAFF**

**WORKSHOP**

**RIDMATUHAB PROJECT SERVICES TRAINING CENTRE, OGUN STATE**

**Classrooms for In-Class Training**

**Open space for carpentry practical**

**Auditorium**

**Open space for masonry works**

**Open Space for Plumbing & pipefitting practical**

**First Aid Box at the Centre.**

Training Documents at the Centre

Interview with trainer

Meeting with quality assurance staff

**SOME PICTURES TAKEN DURING THE CENTER REGISTRATION VISIT ON WED. 11th OCTOBER BY Bldr. ADELEYE ADEDEJI PAUL TO GOVERNMENT SCIENCE TECHNICAL COLLEGE BUKURU, JOS.**

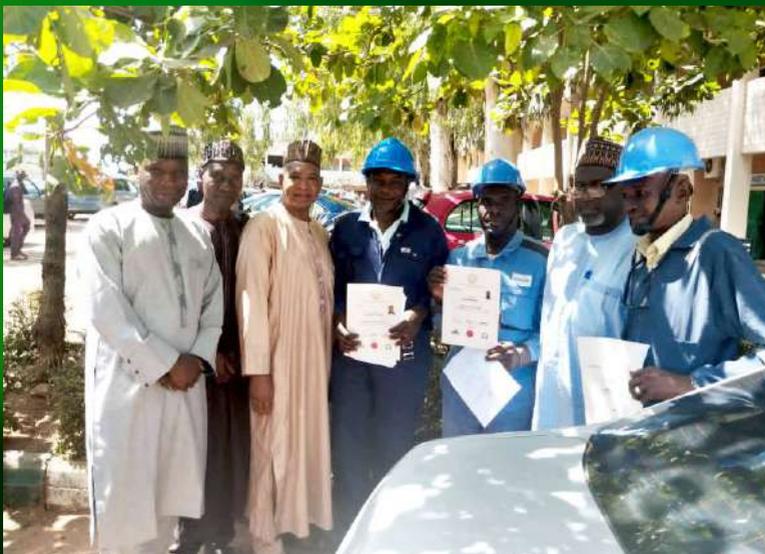

PICTURE SHOWING CENTER SIGNAGE

DISCUSSION DURING THE ASSESSMENT & EXAMINATION OF THE CENTER FACILITIES  
PICTURE SHOWING CENTRE HEAD LEADING

**Presentation ceremony of NSQ level 3 Qualifications certificates to Kad. Poly. Skills center (NIOB as Awarding Body) for the certification. 2nd VP, Bldr. Idris Abubakar Represented the NIOB President at the event.**

**"MANDATORY CONTINUOUS PROFESSIONAL DEVELOPMENT WORKSHOP FOR IQAAS/QAAS, LAGOS CENTER' 5TH-6TH OCTOBER, 2022**

**MANDATORY CONTINUOUS PROFESSIONAL DEVELOPMENT WORKSHOP
